

A cut above

Fully automated, whole muscle nugget production

- Optimize singulation and orientation process
- Reduce labor costs
- Simplicity
- Added functionality with low maintenance

Optimize Nugget Production

The new Marel StripPositioner is an add-on feature to the SingleFeed module. While the SingleFeed singulates bulk items for further processing, the StripPositioner positions strips or tenders for optimal cutting. The StripPositioner rotates the strips and tenders 90 degrees and spaces them appropriately so they are in the perfect position for the I-Cut 122 for nugget portioning.

Easy to operate and maintain

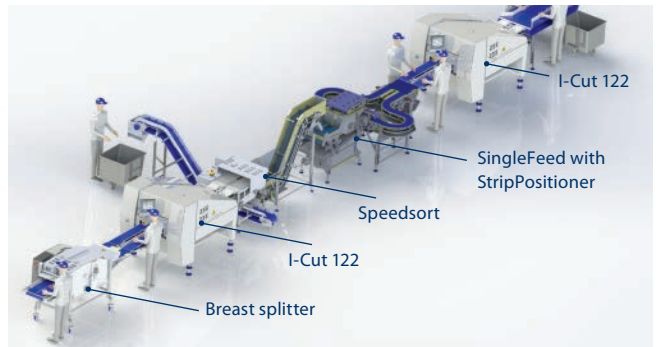

The StripPositioner is added functionality with low maintenance, cleanability and operation. It's a simple design which eliminates the bottleneck area of feeding and orientation of strips.

Higher productivity

The StripPositioner provides higher productivity with a reduction of labor. Improves yield by reducing rework/trim pieces that are caused from poor infeed quality. This new StripPositioner system realizes approx. 30% higher throughput with 5-6% higher yield and at the same time better product quality with a labor reduction.

Advantages at a glance

- Automated strip orientation
- Easy to operate and maintain
- Increased yield and productivity
- Reduce labor costs
- Improves throughput by approx. 20-30%

Marel is the leading global provider of advanced equipment and systems for the fish, meat and poultry industries.
